

Technical information

CUPROVIN 50 – "EC Fertilizer",

Inorganic mineral fertilizer with copper (Cu) from copper oxychloride

Type of the fertilizer: E.1.3g

Chemical name: Dicopper chloride trihydroxide
CAS No.: 1332-65-6
EC No.: 215-572-9

Cuprovin 50 is used for foliar application on cultures between vegetation period, at deficiency of the copper. Do not exceed the recommended quantities. The proposed recommendations are general in nature, it must be taken into account the needs of specific crops and their conditions of cultivation.

Use

Cuprovin 50 is used for foliar application on cultures, at deficiency of the copper. Fertilizer must be included in the overall balance of intake of copper on the same land and it must not exceed the maximum permitted annual intake of copper on the same surface.

Technical data

| Property | Value |
|----------------------------------|--------------------|
| Appearance | Green, fine powder |
| Odour | Odourless |
| Copper content (Cu) | 49,6 – 50,4 % |
| pH (1% aqueous dispersion, 20°C) | 6,5-9,0 |

Packing

1 kg, 25 kg
