

## TITANIUM DIOXIDE RC 8

### Type

RC 8 is a milled rutile pigment, not micronized, produced by the sulphate process by CINKARNA CELJE - SLOVENIA. The pigment is lattice-stabilized with aluminium compounds without surface treatment.

### Applications

- road marking paints
- floor coverings
- artificial stones
- plastics (PE)
- welding electrodes

### Technical data parameter

<b>TiO<sub>2</sub> content</b>	min 97.5 %	ISO 591-1
<b>Oil absorption</b>	max 20 g/100 g	ISO 787-5
<b>Moisture (by packing)</b>	max 0.5 %	ISO 787-2
<b>pH</b>	6.5 – 9.5	ISO 787-9
<b>Sieve residue (µm40)</b>	max 0.1 %	ISO 787-7
<b>CIE Lab (powder)</b>		
<b>L*</b>	min 97.0	Internal Method
<b>b*</b>	max 2.5	Internal Method

### Packaging

- 20 kg in multiply paper sacks, packed 40 sacks per pallet, wrapped with stretch-hood foil suitable for recycling.
- Big-bags up to 1000 kg.
